

Hunts District Council has highlighted the following community health message and asked that you be vigilant and take note of Public Health/CCC/HDC messages relating to this area of concern.

“The overall admission rates at Hinchingsbrooke Hospital related to Covid-19 are not declining at the rate we would, at this stage, expect and there are some hotspots emerging from patients with symptoms who are presenting at primary care (largely GPs and community pharmacies). These concentrations are found in Huntingdon, St Neots and Sawtry.

It is essential that we get strong messages out to residents in these areas to continue to follow the advice from our health experts of working from home wherever possible, maintaining social distancing and avoiding non-essential travel. Could you please use your local communication channels to get this message to your residents?”

We would ask you to re-iterate and re-inforce the community health message in your local areas please:

Stay at home as much as possible

Work from home if you can

Limit contact with other people

Keep your distance if you have to go out – (2 metres apart where possible)

Wash your hands regularly

Do not leave home if you, or anyone within your household, have symptoms.
